DEVICES AND METHODS OF CONTROL

Magnetic surface-modified nanosized sorbent for MSPE-HPLC-UV determination of 4-nonylphenol in natural waters D.V. Pryazhnikov, M.S. Kiseleva, I.V. Kubrakova	220
The sputtering rate of elements in DC glow discharge, used in atomic emission spectrometry A.L. Chicherskaya, A.A. Pupyshev	230
Reaction features of 18-molibdodiphosphate and Folin-Ciocalteu reagent with phenolic compounds T.A. Denisenko, A.B. Vishnikin, L.P. Tsiganok	242
Solid phase spectrophotometric determination of nitrite in water using Griess reagent and safranin immobilized in a polymethacrylate matrix N.A. Gavrilenko, N.V. Saranchina, A.V. Sukhanov	252
Determination of copper, zinc, cadmium and lead in water using diffuse reflectance spectroscopy method A.Sh. Ramazanov, Esmail Gameel Qasim	259
Extraction of tannin, gallic acid and pyrogallol from aqueous media with water-soluble polymers and their determination in concentrates by thin-layer chromatography P.T. Sukhanov, A.N. Il'yin, E.V. Churilina, G.V. Shatalov	268
